

Dear Sir,

date

I am very interested in a job opportunity as a Divemaster in your dive school (would also be available for any liveaboard trips) during December and January. Am very motivated to develop my diving knowledge further, gain more experience and in the future would like to become a PADI Instructor.

During my training from PADI Open Water to Divemaster I conducted and logged 110 dives, so I have experienced diving in many conditions (like drift dive, night dive, deep dive and wreck dive etc.). Furthermore I experienced diving in many places, Malaysia (Palau Tioman), Borneo (Sipidan and Mabul), Philippines (Moal Boal, Malapascua and Puerto Galera), New Zealand (Poor Knights Island) and Indonesia (Pulau Weh), which gave me insight in different underwater ecosystems and diving conditions.

I consider myself to be a very communicative and open minded person and I speak more than 4 languages currently. During my travels and Culture studies at University I learned to deal with people from different cultural backgrounds.

As I studied Biology as a Minor I am very interested in conservation, ecological issues and understanding and studying marine life.

Based on this I understand diving not as a purely recreational activity but as a chance to study and therefore conserve the marine habitat. As a Divemaster I have the chance to share knowledge about marine life and inspire divers to appreciate the richness of marine life and treasure it.

I am a very reliable and responsible person and I am very careful to apply safe diving practices.
